Each fact is explained in detail, accompanied by fun illustrations and graphics. Written by Alice James, Eddie Reynolds, Minna Lacey, Rose Hall, Alex Frith.

Science is a huge topic, but this friendly book breaks it down into bite-sized chunks, making it an accessible introduction for anyone who wants to find out about this fascinating subject. Highly illustrated, in a pictorial, "infographics" style, with snippets of information about all aspects of science from particle physics to genes and DNA. A fresh, new approach to science big and small, inspiring a new generation of scientists. There is an increasing popularity and interest in all sorts of aspects of science, and this book caters for children (and adults) who want an overview.

Science is a huge topic, but this friendly book breaks it down into bite-sized chunks, making it an accessible introduction for anyone who wants to find out about this fascinating subject. Highly illustrated, in a pictorial, 'infographics' style, with snippets of information about all aspects of science from particle physics to genes and DNA.

What are phantom islands? How did the Black Death cause an ice age? How could graffiti save endangered tortoises? Find the answers to these questions and 97 more in this bold, graphic and exciting book, full of amazing things to know about Planet Earth. Illustrations: Full colour throughout

An eye-catching information book filled with one hundred interesting facts to learn from history: who really discovered America, who were the kings and queens we hear a lot about on TV, why America invaded Canada, and lots of other random facts to make history a fun subject!

The body is a huge topic, but this friendly book breaks it down into bite-sized chunks, making it an accessible introduction for anyone who wants to find out about this fascinating subject. Highly illustrated, in a pictorial, 'infographics' style, with snippets of information about all aspects of the body.

100 carefully curated, useful things that will stimulate your baby or toddler's natural curiosity about the world around them... Help your little one learn important vocabulary and build knowledge with this first word and picture book. Cleverly designed to inform and entertain, 100 First Things to Know takes your little one on an exciting learning adventure. As they point to the pictures and say the words, children can soon recognize colors, shapes, and patterns, count to 10, learn about life cycles, and name weathers and seasons. They will also be introduced to words from the worlds of art, music, math, and science. Part of an award-winning first word book series that mixes engaging, real-life photos with entertaining illustrations, 100 First Things to Know has big and colorful pages showing lots of things to talk about, learn about, and smile about! The clear word labels encourage naming and picture-and-word association, building language and reading readiness, and every page is a visual treat, making this beautiful look-and-point board book an attractive baby, toddler, or preschool gift.

An eye-catching information book filled with one hundred interesting facts to learn about food: for example, learn about how cooking came about, the different methods used (grilling, boiling, fermentation etc) and what purposes it served in terms of nutrition. It will also be a great way to educate children about nutrition and the issues around overeating, junk food and obesity.

An eye-catching information book filled with one hundred quirky and surprising facts about the seas and oceans. Do fish wear pyjamas? What's the sound of an iceberg melting? How many sheep did it take to launch a Viking longship? Which is faster - a tsunami or a bullet train? Find the answers to these and many more questions in a book that explores the history, science, environment and art of our planet's seas and oceans. Richly illustrated and perfect for broadening children's knowledge of an essential subject, away from the classroom. Part of the popular '100 Things to Know' series, ideal gifts for fact-hungry children. Each page features a new fact supported by clear, comprehensible explanations and bold illustrations, maps and infographics. Perfect to dip in and out of, alone or with friends and family.

We design to elicit responses from people. We want them to buy something, read more, or take action of some kind. Designing without understanding what makes people act the way they do is like exploring a new city without a map: results will be haphazard, confusing, and inefficient. This book combines real science and research with practical examples to deliver a guide every designer needs. With it you'll be able to design more intuitive and engaging work for print, websites, applications, and products that matches the way people think, work, and play. Learn to increase the effectiveness, conversion rates, and usability of your own design projects by finding the answers to questions such as: What grabs and holds attention on a page or screen? What makes memories stick? What is more important, peripheral or central vision? How can you predict the types of errors that people will make? What is the limit to someone's social circle? How do you motivate people to continue on to (the next step)? What line length for text is best? Are some fonts better than others? These are just a few of the questions that the book answers in its deep-dive exploration of what makes people tick.

Astronomers are discovering more and more information about space, making the subject a very hot topic in schools and out of it. This guide is full of genuine facts, answering all our space-related questions and prompting more along the way. Aimed at children aged nine and over, the pictorial infographics style illustrations provide easily digestible facts in bite-size chunks.
