After controlling covariates, motivation was also a significant factor for self-management. In the mediation analysis, motivation completely mediated the relationship between education and self-management,  $z = 2.292$ ,  $p = .021$ . Motivation is an important part of self-management, and self-management education is not effective without motivation.

### Motivation and Self-Management Behavior of the Individuals

Self-control, an aspect of inhibitory control, is the ability to regulate one's emotions, thoughts, and behavior in the face of temptations and impulses. As an executive function, self-control is a cognitive process that is necessary for regulating one's behavior in order to achieve specific goals.. A related concept in psychology is emotional self-regulation.

### Self-control - Wikipedia

Executive function relates to behavioral elements associated with control and physical energy. It indicates the state of one's mental health and their self-control ability. Certain behaviors raise risks of mental health concerns such as bipolar disorder. An individual with behavioral problems may struggle with self-control.

Self-determination theory (SDT) is a macro theory of human motivation and personality that concerns people's inherent growth tendencies and innate psychological needs.It is concerned with the motivation behind choices people make without external influence and interference. SDT focuses on the degree to which an individual's behavior is self-motivated and self-determined.

### Self-determination theory - Wikipedia

Extrinsic motivators can sometimes lower self-determination. According to Deci, giving people extrinsic rewards for already intrinsically motivated behavior can undermine autonomy. As the behavior becomes increasingly controlled by external rewards, people begin to feel less in control of their own behavior and intrinsic motivation is diminished.

### Self-Determination Theory: How It Explains Motivation

The organizational self?control literature usually applies resource perspectives that explain self?control failure at work by depletion of self?control resources. However, these perspectives neglect the role of self?control motivation. On a daily level, we examine several self?control aspects (resources, motivation, demands, and effort) as predictors of a manifestation of self?control failure at work, namely daily counterproductive work behavior toward the organization (CWB?O).
