In the disciplines of applied linguistics and second language acquisition (SLA), the study of pragmatic competence has been driven by several fundamental questions: What does it mean to become pragmatically competent in a second language (L2)? How can we examine pragmatic competence to make inference of its development among L2 learners? In what ways do research findings inform teaching and assessment of pragmatic competence? This book explores these key issues in Japanese as a second/foreign language. The book has three sections. The first section offers a general overview and historical sketch of the study of Japanese pragmatics and its influence on Japanese pedagogy and curriculum. The overview chapter is followed by eight empirical findings, each dealing with phenomena that are significant in Japanese pragmatics. They target selected features of Japanese pragmatics and investigate the learners' use of them as an indicator of their pragmatic competence. The target pragmatic features are wide-ranging, among them honorifics, speech style, sentence final particles, speech acts of various types, and indirect expressions. Each study explicitly prompts the connection between pragmalinguistics (linguistic forms available to perform language functions) and sociopragmatics (norms that determine appropriate use of the forms) in Japanese. By documenting the understanding and use of them among learners of Japanese spanning multiple levels and time durations, this book offers insight about the nature and development of pragmatic competence, as well as implications for the learning and teaching of Japanese pragmatics. The last section presents a critical reflection on the eight empirical papers and prompts a discussion of the practice of Japanese pragmatics research.

This monograph presents the result of the authors' scientific research on the development of cognitive discursive approach to issues of intercultural professional and business communication (IPBC) and the study of the language of professional communication, the links binding the language with non-linguistic and extralinguistic realia in the framework of cognitive linguistics, as well as oral and written communication in intercultural professional business discourse. The authors proceed from the assumption that IPBC can only reach maximum efficiency provided that its participants assimilate its inherent norms and rules and are able to skillfully implement these norms and rules to verbalise their cognitive activity in the sphere of professional business interaction. Topics covered include: analysis of the theory of business communication, of codified and uncoded vocabulary, theory of euphemy, and euphemisms used in intercultural professional and business communication.

The Routledge Handbook of Second Language Acquisition and Pragmatics is a comprehensive critical survey of the field of L2 pragmatics, collecting a number of chapters that highlight the key theories, methods, pedagogies, and research findings throughout its development over the last four decades. Demonstrating the ways in which pragmatics has long served as a lens through which to examine patterns of L2 development, the volume is divided into six parts which reflect the field's structure and evolution: • Constructs and units of analysis • Theoretical approaches • Methodological approaches • Pedagogical approaches • Contexts and individual considerations • L2 pragmatics in the global era The handbook has a particular focus on covering not only traditional topics in the field, such as constructs of pragmatic competence (e.g., speech acts, implicature), teaching and assessment, and pragmatics learning in a study

abroad program, but also emerging areas of study, including interactional pragmatics, intercultural pragmatics, usage-based approaches, corpus linguistics, and psycholinguistic experimentation. Each chapter introduces the topic and follows with a description of its theoretical underpinnings, an overview of existing literature, appraisal of current practice, concluding with a discussion of future directions for research and key readings. The Routledge Handbook of Second Language Acquisition and Pragmatics is an essential resource for those with an interest in second language acquisition, pragmatics, and language teaching.

The Longitudinal investigation which provides the basic material for this book consists of a corpus of requests, offers and refusals of offers elicited from Irish learners of German over a ten-month study abroad period using production questionnaires and a variety of metapragmatic instruments.

This encyclopaedia of one of the major fields of language studies is a continuously updated source of state-of-the-art information for anyone interested in language use. The IPrA Handbook now contains nearly 5,000 pages. It provides easy access – for scholars with widely divergent backgrounds but with convergent interests in the use and functioning of language – to the different topics, traditions and methods which together make up the field of Pragmatics, broadly conceived as “the cognitive, social and cultural study of language and communication”.
