About the Book Compounding was taught to us in school, but some-how we have forgotten about it, or we tend to associate it with Interest on our Investments only. We were taught about the formula of calculating Compound Interest in School, but there's so much more to Compounding than only Interest. Compounding touches and affects us, at each and every stage in our life, while growing up, in our habits, in education, In Sports, in our Relationships, what we eat, drink and what the person we finally become. Everything we do, is either a result of Compounding or is compounding into something that will affect us later on. The book explains it in Simple language even a child can understand. You will be amazed by what it can do to your Wealth, your Health, your relationships and consequently your life. No Wonder Compounding is the 8th wonder! Happy Reading and Happy Compounding!

About the Author He is a Financial Planner, having 35 years of experience in Financial Services, with certifications of CFGP and AFGP from AAFM(USA) and AWARD IN FINANCIAL PLANNING from CII(UK). Having started out as a distributor of Financial Products in 1984, he is considered an Influencer in the Personal Finance space. Having qualified to be a LIFE MEMBER of the Prestigious MILLOIN DOLLAR ROUND TABLE-MDRT(USA), a distinction, very few Insurance Advisors across the world are able to achieve, he is also a life member of the CHAIRMAN'S CLUB, LIC OF INDIA. He has the unique distinction of putting out ONE, 2-minute video on a Personal Finance topic, The 2 Minute Money and Personal Finance Show, every day, on his YouTube channel. At the time of writing this book there were 312 videos already out, which he intends to do continuously for 365 days at least!

The concept of Artificial Intelligence (AI) & Machine Learning (ML) has been in practice for over years with the advent of technological progress. Over time, it has blended our lives through nearly every narration of learning, teaching, enjoyment, normal routine operations and what not. The aspect delivers a common understanding of the topics with reference to it making an impact on our lives, with a better framework of technology affecting our lives in particular. Let us look up to science for a change to be brought about in us. Let us create awareness of making technology available to people, in a broader sense. As that happens, people who are responsible need to be told about the use and misuse of the same. As we lead our lives, we come across the fact that AI, Robotics and Learning Machines seem to be the household topic of discussion. Earlier, AI was perceived to be reserved for only 'Geniuses' or 'Researchers' or the 'computer' community, but it very aptly integrates and impacts each and every aspect of our lives. Knowingly or unknowingly, it has become intellectually influential in shaping our thoughts, actions and the day-to-day chores.

Artificial Intelligence(AI), gets your system to think smart and intelligent. This book is packed with some of the smartest and easy-peasy examples through which you will learn the fundamentals of AI. You will have acquired the foundation of AI and understood the practical case studies in this book.

This book constitutes the thoroughly refereed post-conference proceedings of the 20th International Conference on Case-Based Reasoning Research and Development (ICCBR

This book constitutes the refereed proceedings of the 7th European Conference on Case-Based Reasoning, ECCBR 2004, held in Madrid, Spain in August/September 2004. The 56 revised full papers presented together with an invited paper and the abstract of an invited talk were carefully reviewed and selected from 85 submissions. All current issues in case-based reasoning, ranging from theoretical and methodological issues to advanced applications in various fields are addressed.

What is artificial intelligence (AI)? How did it evolve over the years and what is it going to look like in the future? What are the opportunities and risks associated with AI? Where does India

Where To Download Deepak Khemani Artificial Intelligence

stand among the global AI ecosystems? This book answers these questions and gives a bird's-eye view of the field of AI, with a special focus on India. In clear, jargon-free language it explains what is and, more importantly, what is not AI. It provides a well-rounded summary of the ongoing debates on ethics, regulation, bias, and data privacy surrounding the development and use of AI technology. Using up-to-date data, the book looks at India's contributions to and adoption of AI, as the country has a significant stake in the AI revolution as one of the fastest growing economies.

Crucial reading for those concerned with education and school reform.
