Once the assessment and planning phases have been conducted, and interventions have been selected for implementation, the final stage of designing a workplace health program involves decisions concerning the monitoring and evaluation of program activities. Just as assessment data are critical for evidenced-based program planning and implementation, so too is evaluation to prove that workplace health interventions have been effective and build the business case for continuing them.

Increasingly, public health programs are accountable to funders, legislators, and the general public. Many programs do this by creating, monitoring, and reporting results for a small set of markers and milestones of program progress. Such “ performance measures ” are a type of evaluation—answering the question “ How are we doing? ”

[Program Evaluation Guide - Introduction - CDC](#)

Evaluating Health Promotion Programs | 3 Step 1: Clarify program What is Step 1 about? This step is about forming a strong foundation for program evaluation. It is important to assess whether your program is ready to be evaluated. That means gathering information about the program and sharing it with stakeholders as you begin to plan for evaluation.
