generally drawn at values divisible by 5 or 10; note the contour interval is 20 ft.)

Environmental Geology, Topographic Map Lab

A topographic map is a useful type of map that adds a third dimension (vertical) to an otherwise two-dimensional map defined by the north, south, east, and west compass directions. This third dimension on a topographic map is represented by contour lines, which are imaginary lines drawn on a map that represent a constant elevation above either average sea level (a.s.l.) or mean sea level (m.s.l.).
