Amada America

As stated by Nosman, you'll need to  
determine this from your ladder on the  
CRT; a paper copy of the ladder  
program; or a listing of the PC  
parameters in a book written by the  
MTB, perhaps a maintenance manual,  
or an electrical-related book. It won't  
be in a Fanuc book, because this is a  
builder-defined function.
