Holden has confirmed an initial local content level of between 40 and 50 percent if assessed by retail value, with an aim of increasing Cruze localization over time. Series II styling revisions to the grille, lower air intake, and bumper have softened the front-end to bear a closer resemblance to Holden's larger VE II Commodore.

In the meantime, Holden has used the arrival of the Cruze Series II to broaden the model range. Initially government and business fleets will be Holden's primary targets; the Made in Australia tag may open a few doors that have been closed of late, although Holden knows it won't sell cars simply because the Cruze is homegrown.

The Cruze sedan and hatch have been built at Holden's Elizabeth plant in South Australia since 2011 and on October 7, 2016 the last Cruze will leave the building. The next-generation Cruze will then be imported. That means the SRi Z-Series sedan we just tested could be the last Australian-made Cruze we sit in.

JH Series II MY12 SRi-V Hatchback 5dr Spts Auto 6sp 1.4T Holden's locally-built Cruze hatch arrived in November 2011, fleshing out the company's bid to broaden its presence in the small-car sector. With sharp looks and increased practicality over the Cruze sedan, the five-door makes sense to families needing extra loading flexibility.

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Introduction Chapter 1: Tune-up and routine maintenance Chapter 2: Part A: Engines Chapter 2: Part B: General engine overhaul procedures Chapter 3: Cooling, heating and air conditioning systems Chapter 4: Fuel and exhaust systems Chapter 5: Engine electrical systems Chapter 6: Emissions and engine control systems Chapter 7: Part A: Manual transaxle Chapter 7: Part B: Automatic transaxle Chapter 8: Clutch and driveaxles Chapter 9: Brakes Chapter 10: Suspension and steering systems Chapter 11: Body Chapter 12: Chassis electrical system

Robbins Management: The Essentials covers the concepts essential to management in the 21st century in a fresh, lively format that's perfectly suited to a typical university semester. The second edition features new and in-depth coverage of sustainability, ethics and corporate social responsibility and new case studies from local and international businesses.

Greening Auto Jobs: A Critical Analysis of the Green Job Solution provides a major contribution to the growing and important field of environmental sociology and labor studies by providing a theoretical and practical understanding of how the broader political-economic relations of society affect the relationship between labor and the environment.

Set in London's Soho in the 1980s, Cruise tells the story of what should have been Michael Spencer's last night on Earth. Diagnosed with HIV in 1984, he's told by doctors that he has just four years to live, so as the clock runs down, Michael decides to go out in style. As he parties and bids final farewells to his friends, the clock strikes zero and Michael... survives. With the gift of life, how can he go on living? Jack Holden's debut play Cruise is a kaleidoscopic new monologue celebrating queer culture and paying tribute to a generation of gay men lost to the AIDS crisis. This edition was published to coincide with its West End production in May 2021.

Explores workplace relations in the twenty-first century and examines the Global Financial Crisis and the Fair Work Act 2009.

Holden numbering system guide

Holden is one of the few brands that has an emotional grip on Australia (Qantas being another). The closure of the Holden factory in Adelaide is not just the end of a business - it's the end of an era, of a story, and of a great Australian dream. When Holden signalled that it would close its Adelaide factory, it struck at the very heart of Australian identity. Holden is our car made on our shores. It's the choice of patriotic rev heads and suburban drivers alike. How could a car that was so beloved - and so popular - be so unprofitable to make? The story of the collapse of Holden is about the people who make and drive the cars; it's about sustaining industry in Australia; it's about communities of workers and what happens when the work dries up. And if it's not quite about the death of an icon - because Holdens will remain on Australian roads for a long time to come - then it's about what happens when an icon falls to knees in front of a whole nation. 'Brilliant and powerful' Nick Xenophon
