File Type Verifier is a program that is available as part of the Windows 7 SDK. It is designed to help developers who create custom Windows File Types to detect potential issues with their file types. Although the File Type Verifier runs only on Windows 7 and later, the rules that the File Type Verifier enforces apply to all versions of Windows ...

Some examples of file types that are considered public are the image file types .png, .gif, .jpg, and .bmp, and the audio types .wav, .mp3, and .au. Unlike public file types, private or proprietary file types typically have a format that is implemented and understood by only one application or vendor.

PowerPoint uses three main file types: Presentation, Template, and Slide Show. For the most part, you can construct and deliver simple presentations without ever having to deal with the differences among these types of files. But before you can effectively use PowerPoint's advanced formatting options, you have to understand its file formats.
