Tomorrow's Lawyers predicts that we are at the beginning of a period of fundamental transformation in law: a time in which we will see greater change than we have seen in the past two centuries. Where the future of the legal service will be a world of internet-based global businesses, online document production, commoditized service, legal process outsourcing, and web based simulation practice. Legal markets will be liberalized, with new jobs for lawyers and new employers too. This book is a definitive guide to this future - for young and aspiring lawyers, and for all who want to modernize our legal and justice systems. It introduces the new legal landscape and offers practical guidance for those who intend to build careers and businesses in law. Tomorrow's Lawyers is divided into three parts. The first is an updated restatement of Richard Susskind's views on the future of legal services, as laid out in his previous bestselling works, *The Future of Law*, *Transforming the Law*, and *The End of Lawyers?*. He identifies key drivers of change, such as the economic downturn, and considers how these will impact on the legal marketplace. In the second part, Susskind sketches out the new legal landscape as he predicts it, including the changing role of law firms, and in-house lawyers, with virtual hearings and online dispute resolution. The third part focuses on the prospects for aspiring lawyers, predicting what new jobs and new employers there will be, and equipping prospective lawyers with penetrating questions to put to their current and future employers. This new edition has been fully updated to include an introduction to online dispute resolution, Susskind's views on the debates surrounding artificial intelligence and its role in the legal world, a new analysis of new jobs available for lawyers, and a retrospective evaluation of *The Future of Law*, Susskind's prediction published in 1996 about the future

of legal services. This is the essential introduction to the future of law for those who want to succeed in the rapidly changing legal landscape.

Central America has received renewed attention from U.S. policymakers over the past few years as the region has become a major transit corridor for illicit drugs and has surpassed Mexico as the largest source of irregular migration to the United States. These narcotics and migrant flows are the latest symptoms of deep-rooted challenges in several countries in the region, including widespread insecurity, fragile political and judicial systems, and high levels of poverty and unemployment. The U.S. government and partners in the region have begun to implement new initiatives intended to address those challenges, but living conditions in Central America have yet to improve significantly. U.S. Strategy for Engagement in Central America The Obama Administration determined it was in the national security interests of the

United States to work with Central American governments to address their challenges. With congressional support, it launched a new U.S. Strategy for Engagement in Central America and significantly increased aid to the region. The strategy takes a broader, more comprehensive approach than previous U.S. initiatives in Central America and is based on the premise that efforts to promote prosperity, improve security, and strengthen governance are mutually reinforcing and of equal importance. The strategy focuses primarily on the "Northern Triangle" countries of Central America (El Salvador, Guatemala, and Honduras), which face the greatest challenges and are carrying out complementary efforts under their Alliance for Prosperity initiative. It also provides an overarching framework for U.S. engagement with the other countries in the region: Belize, Costa Rica, Nicaragua, and Panama. The Trump Administration has maintained the U.S. Strategy for Engagement in Central America but has adjusted the initiative to place more emphasis on preventing illegal immigration, combating transnational crime, and generating export and investment opportunities for U.S. businesses. The Administration also has sought to scale back U.S. assistance to Central America, but Congress has rejected the majority of the proposed reductions.

The #1 New York Times bestselling author and firebrand syndicated columnist Michelle Malkin sets her sights on the corrupt businessmen, politicians, and lobbyists flooding our borders and selling out America's best and brightest workers. In *Sold Out*, Michelle Malkin and John Miano name names and expose the lies of those who pretend to champion the middle class, while aiding and abetting massive layoffs of highly skilled American workers in favor of cheap foreign labor. Malkin and Miano will explode some of the most commonly told myths spread in the media like these: Lie #1: America is suffering from an apocalyptic "shortage" of science, technology, engineering, and math workers. Lie #2: US companies cannot function without an unlimited injection of the "highly skilled" and "highly educated" foreign workers, who offer capital and energy that American workers can't match. Lie #3: America's best and brightest talents are protected because employers are required to demonstrate that they've made every effort to hire American citizens before resorting to foreign labor. For too long, open-borders tech billionaires and their political enablers have escaped tough public scrutiny of their means and motives. It's time to trade the whitewash for solvent. American workers deserve better and the public deserves the unvarnished truth.
