By far the best book in the list is "Computer Networking" by Kurose and Ross. This book covers all of the essential material that is in the other books but manages to do so in a relevant and entertaining way. This book is very up to date as seen by the release of the 5th Ed when the 4th Ed is barely two years old.

No need to wait for office hours or assignments to be graded to find out where you took a wrong turn. You can check your reasoning as you tackle a problem using our interactive solutions viewer.

[Computer Networking 7th Edition Textbook Solutions | Chegg.com](#)

But I am now using Kurose & Ross for my networking class, and it is far better for an intuitive understanding of networking. What makes Kurose & Ross better for a first course in networking? It reads quite well (except for Chapter 5, I think the editor forgot to take a look at that one), which is an incredible achievement for a networking book.
