Oil Filled Radiators, commonly used in domestic or office environments are a great way to provide much needed heat when it's cold. They are electrically powered which in turn, heats the oil and provides the heat.

Oil Filled Radiators | Fires, Stoves & Electric Heating ...

Oil filled heaters usually do not have fans to blow the heat into the room. Rather they use thermal channels to distribute heat in the area. The lack of a fan in an oil filled heater is what makes it silent and great. You will not have to suffer the pain of hearing constant noises. That is why oil filled heaters are perfect for family use.
