This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

In the first book to argue for the benefits of boredom, Peter Toohey dispels the myth that it's simply a childish emotion or an existential malaise like Jean-Paul Sartre's nausea. He shows how boredom is, in fact, one of our most common and constructive emotions and is an essential part of the human experience. This informative and entertaining investigation of boredom--what it is and what it isn't, its uses and its dangers--spans more than 3,000 years of history and takes readers through fascinating neurological and psychological theories of emotion, as well as recent scientific investigations, to illustrate its role in our lives. There are Australian aboriginals and bored Romans, Jeffrey Archer and caged cockatoos, Camus and the early Christians, Durer and Degas. Toohey also explores the important role that boredom plays in popular and highbrow culture and how over the centuries it has proven to be a stimulus for art and literature. Toohey shows that boredom is a universal emotion experienced by humans throughout history and he explains its place, and value, in today's world. "Boredom: A Lively History "is vital reading for anyone interested in what goes on

A doctor in the Dutch East Indies torn between his medical duty to help and his own mixed emotions; a middle-aged maidservant whose devotion to her master leads her to commit a terrible act; a hotel waiter whose love for an unapproachable aristocratic beauty culminates in an almost lyrical death and a prisoner-of-war longing to be home again in Russia. In these four stories, Stefan Zweig shows his gift for the acute analysis of emotional dilemmas. His four tragic and moving cameos of the human condition are played out against cosmopolitan and colonial backgrounds in the first half of the twentieth century.

In this completely revised and updated edition (including eight new chapters), Jeffrey Jones charts the evolution and maturation of political entertainment television by examining *The Daily Show* with Jon Stewart, *The Colbert Report*, *Politically Incorrect/Real Time* with Bill Maher, and Michael Moore's *TV Nation* and *The Awful Truth*. This volume investigates how and why these shows have been central locations for the critique of political and economic power and an important resource for citizens during numerous political crises. In an age of Truthiness, fake news and humorous political talk have proven themselves viable forms of alternative reporting and critical means for ascertaining truth, and in the process, questioning the legitimacy of news media's role as the primary mediator of political life. The book also addresses the persistent claims that these programs have cynical effects and create misinformed young citizens, demonstrating instead how such programming provides for an informed, active, and meaningful citizenship. The new edition takes account of the

many changes that have occurred in television and political culture since Entertaining Politics' initial release.
