(Terzhagi). It is also possible to analyze settlement using the finite element method in the FEM program.

Settlement Analysis | Geotechnical Software GEO5 | Fine Soil consolidation refers to the mechanical process by which soil changes volume

Download Free Settlement Program Excel Soil

Consolidation gradually in response to a change in pressure. This happens because soil is a two-phase material, comprising soil grains and pore fluid, usually groundwater. When soil saturated with water is subjected to an increase in pressure, the high volumetric stiffness of water compared to the soil matrix means that the
