two distinct phases: Software Architecture and Software Design. In Architecture, nonfunctional decisions are cast and separated by the functional requirements. In Design, functional requirements are accomplished. Software Architecture. Architecture serves as a blueprint for a system. It provides an abstraction to manage the system complexity and establish a communication and coordination mechanism among components.

Software Architecture &
Design Introduction -
Tutorialspoint

Online Library Software Systems Architecture

Software architecture refers to the fundamental structures of a software system and the discipline of creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. The architecture of a software system is a metaphor, analogous to the architecture of a building. It functions as a blueprint for the system and the developing project, laying out the tasks necessary to be executed by the design teams. Software ar

Online Library Software Systems Architecture Working With Stakeholders Wikipedia Using Viewpoints And Software Systems Architecture is a

practitioner-oriented guide to designing and implementing effective architectures for information systems. It is both a readily accessible introduction to software architecture and an invaluable handbook of well-established best practices. It shows why the role of the architect is central to any successful information systems development project, and, by presenting a set of architectural viewpoints and perspectives, provides specific direction for

Online Library Software Systems Architecture Improving Working With Stakeholders Using Viewpoints And Perspectives 2nd Edition Software Systems

Architecture

A key part of your role as an architect is knowing how to work with stakeholders in order to create an architecture that meets their complex, overlapping, and often conflicting needs. Viewpoints (and views) are an approach to structuring the architecture definition process and the architectural description, based on the principle of separation of concerns .
