Debt deflation is a concept that pertains to the effects of debt on the price of properties, goods, and services. Borrowers will typically experience decreasing property values from debt deflation,...

*Debt Deflation - Investopedia*

Debt deflation is a theory that recessions and depressions are due to the overall level of debt rising in real value because of deflation, causing people to default on their consumer loans and mortgages. Bank assets fall because of the defaults and because the value of their collateral falls, leading to a surge in bank insolvencies, a reduction in lending and by extension, a reduction in spending.

*Debt deflation - Wikipedia*

Following the stock market crash of 1929 and the ensuing Great Depression, Fisher developed a theory of economic crises called "debt-deflation", which rejected general equilibrium theory and attributed crises to the bursting of a credit bubble. According to the debt deflation theory, a sequence of effects of the debt bubble bursting occurs: 1.

*The Debt-Deflation Theory of Great Depressions: Amazon.co ...*

Debt deflation is a theory based on the principle of the correlation between the debt burden and the price level in a country. Deflation has the effect of significantly reducing the debt burden. Conversely, a price increase leads to an increase in the debt burden. This is the theory put forward by its creator Irving Fisher in 1933.

Fisher's "Debt-Depression Theory of Great Depressions" (*Econometrica* 1: 337–357, 1933), explaining what had gone wrong, attracted little attention at the time, given the wreckage of Fisher's reputation, but from 1975 onwards influenced the views of Hyman Minsky, James Tobin, Ben Bernanke and Mervyn King on how to avoid another depression—an influence that had practical relevance for the response of Bernanke and King to the possibility of the collapse of financial intermediation ...

*The Debt-Deflation Theory of Great Depressions | SpringerLink*

IRVING FISHER'S DEBT-DEFLATION THEORY OF GREAT DEPRESSIONS fall of 1929 must be balanced against his prediction of a stock price boom in 1930. If one views the bull market of the 1920s as a speculative bubble, all that could be predicted is that the bubble would eventually burst, not when.

*Irving Fisher's Debt-Deflation Theory of Great Depressions*

The current preoccupation with debt harks back to a long tradition in economic analysis, from Fisher's (1933) theory of debt deflation to Minsky's (1986) back-in-vogue work on financial instability to Koo's (2008) concept of balance-sheet recessions.

In this work he shares his Cycle-theory which proposes that the equilibrium that most economists talk about hardly exists and goes to show that any change in one ar In this work he shares his Cycle-theory which proposes that the equilibrium that most economists talk about hardly exists and goes to show that any change in one area of the economy is going to affect everything else.

*The Debt-Deflation Theory of Great Depressions by Irving ...*

The theory of debt deflation is a macroeconomics concept pertaining to rising debt levels and their negative impact on the economy. The theory proposes that when the level of prices across consumer goods and services continuously drops, debt levels increase, and a period of financial instability results, eventually leading to a recession.
