**History** by Evelyn Lord

Bubonic Plague was known as the Black Death and had been known in England for centuries. It was a ghastly disease. The victim's skin turned black in patches and inflamed glands or 'buboes' in the groin, combined with compulsive vomiting, swollen tongue and splitting headaches made it a horrible, agonizing killer.

History Professor of History, Selwyn College, University of Cambridge. Consultant editor for the Oxford Dictionary of National Biography. Great Plague of London, epidemic of plague that ravaged London, England, from 1665 to 1666. City records indicate that some 68,596 people died during the epidemic, though the actual number of deaths is suspected to have exceeded 100,000 out of a total population estimated at 460,000.

...

The Great Plague of London, lasting from 1665 to 1666, was the last major epidemic of the bubonic plague to occur in England. It happened within the centuries-long Second Pandemic, a period of intermittent bubonic plague epidemics which originated from Central Asia in 1331, the first year of the Black Death, an outbreak which included other forms such as pneumonic plague, and lasted until 1750.
