Named one of the best strategy books of 2021 by *strategy+business* Get to better, more effective strategy. In nearly every business segment and corner of the world economy, the most successful companies dramatically outperform their rivals. What is their secret? In *Better, Simpler Strategy*, Harvard Business School professor Felix Oberholzer-Gee shows how these companies achieve more by doing less. At a time when rapid technological change and global competition conspire to upend traditional ways of doing business, these companies pursue radically simplified strategies. At a time when many managers struggle not to drown in vast seas of projects and initiatives, these businesses follow simple rules that help them select the few ideas that truly make a difference. *Better, Simpler Strategy* provides readers with a simple tool, the value stick, which every organization can use to make its strategy more effective and easier to execute. Based on proven financial mechanics, the value stick helps executives decide where to focus their attention and how to deepen the competitive advantage of their business. How does the value stick work? It provides a way of measuring the two fundamental forces that lead to value creation and increased financial success—the customer's willingness-to-pay and the employee's willingness-to-sell their services to the business. Companies that win, Oberholzer-Gee shows, create value for customers by raising their willingness-to-pay, and they provide value for talent by lowering their willingness-to-sell. The approach, proven in practice, is entirely data driven and uniquely suited to be cascaded throughout the organization. With many useful visuals and examples across industries and geographies, *Better, Simpler Strategy* explains how these two key measures enable firms to gauge and improve their strategies and operations. Based on the author's sought-after strategy course, this book is your must-have guide for making better strategic decisions.

As in *Improving Your Leadership Intelligence A Field Book for K-12 Leaders*, Maulding Green and Leonard have in, *Improving Your Leadership Intelligence: Volume 2 Scenarios in K-12 Leadership*, provided the reader with an ongoing series of situational judgement test (SJT) scenarios, used in a process that assists both novice and experienced leaders to grow their Leadership Intelligence. The main change in the content in this second edition is that all of the scenarios are based on the experiences of practicing and/or recently retired K-12 educational leaders. As in the volume 1, supporting readings are provided from recent literature to further develop the Leadership Intelligence imperatives of credibility, competence, ability to inspire, vision, and emotional intelligence. The book is based on the foundational books setting forth Leadership Intelligence theory: *Leadership Intelligence: Navigating to Your True North* and *Leadership Intelligence: Navigating with Confidence and Humility* (forth coming in the fall of 2019).

Huawei Goes Global provides a much-needed, comprehensive, and scholarly examination of the business environment and the striving global operations of China's technology giant. With theoretical research, case studies, data analysis, and empirical studies, this two-volume work tells a fascinating story of internationalization in an emerging economy. As one of the most powerful Chinese companies in the global economy, the largest global telecommunications-equipment producer and a leading consumer-electronics manufacturer, Huawei is a great example of the globalization of the Chinese enterprises in the twenty-first century. In Volume I, scholars critically examine the rise of Huawei as a Chinese global enterprise from the political economy and public policy perspectives, as well as Huawei's development

strategies, innovations, and talent management. In Volume II, multiple authors carefully study the growth of Huawei from regional and geopolitical perspectives, and its corporate communication and crisis management. Within the framework of the trade conflicts between China and the US, controversies over economic sanctions, intellectual property disputes, and espionage and cyber security concerns, this groundbreaking work makes an important contribution to both academic literature and the ongoing public discourse on Huawei. Transfer pricing treatment of intangibles: Issues und developments In recent decades, intangibles have become one of the most relevant success factors for Multinational Enterprises (MNEs). Along with the increasing importance of intangibles for economies, their tax treatment has also been under scrutiny which includes inter alia respective transfer pricing issues. MNEs are seeking for the best ways to optimize their business arrangements with the related intangibles while, at the same time, getting the most tax-efficient treatment. On the other hand, tax authorities have become increasingly concerned with the ease that intangibles can be used in aggressive planning. These concerns have been noticed and addressed by the Organization for Economic Cooperation and Development which presented its main findings with respect to transfer pricing aspects of intangibles in Action 8 of the BEPS Project in 2015 and in the 2017 OECD Transfer Pricing Guidelines. This book is based on the outcomes of the presentations and discussions held during the WU Transfer Pricing Symposium, ‘ Transfer Pricing and Intangibles: Current Developments, Relevant Issues and Possible Solutions ’ , that took place in October 2018 at the WU Vienna University of Economics and Business. The publication discusses the most important issues and recent developments related to transfer pricing treatment of intangibles. Starting with the definition of intangibles, it further deals with topics such as appropriate attribution of intangible-related profits, structuring of intangibles in MNEs, and proper valuation of intangibles. The authors, apart from providing a theoretical background to the discussed issues, also present case studies that show how certain issues can be approached in practice. Every chapter ends with a summary of the discussions held during the panels of the Transfer Pricing Symposium in which representatives of tax administrations, multinationals, and tax advisories presented their opinions on the issues at stake.
